Lyxor MSCI Eastern Europe Ex Russia UCITS ETF - Acc (the "Fund")

ISIN: LU1900066462 - A sub-fund of the investment company named MULTI UNITS LUXEMBOURG (the "Company") domiciled in Luxembourg. Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Objectives and investment policy

The investment objective is to track both the upward and the downward evolution of the MSCI EM Eastern Europe ex Russia Net Total Return index (Net dividends reinvested) (the "Benchmark Index"), denominated in euros (EUR) and representative of the stock markets of emerging markets countries in Eastern Europe excluding Russia and to minimize the tracking error between the Fund's performance and the performance of the Benchmark Index. The anticipated level of tracking error in normal market conditions is indicated in the prospectus.

MSCI's website (www.msci.com) contains more detailed information about the MSCI indexes.

The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI").

The Fund may also invest in a diversified portfolio of international equities, whose performance will be exchanged against the performance of the benchmark Index via the FDI. Updated composition of the Fund holdings is available on www.lyxoretf.com.

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

The share currency is the Euro (EUR).

- **Invested financial instruments:** International equities, FDI.
- **Dividend policy:** the Fund's amounts available for distribution (if any) shall not be distributed to Shareholders, but reinvested.
- **Net Asset Value:** is daily calculated providing that the relevant stock exchanges are open for trading and orders can be covered.
- **Redemptions:** investors are able to redeem their shares on the primary market every valuation day before 15:30 CET and sell their shares on the secondary market at any time during trading hours on the Fund listing places.

Risk and reward profile

The risk-return category shown above is based on the historical performance of the assets included in the Fund or the performance of its benchmark index or the computed performance of a portfolio model. This risk estimate may therefore not represent a reliable indicator of future risk, and may be subject to change over time. The lowest category does not mean risk free investment.

Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 6. Category 6 indicates that it is possible to suffer a severe loss of capital under normal market conditions ; the value of your investment may change substantially and have quite large daily upside or downside variation.

Main risks not covered by the above indicator which could lead to a decrease in the net asset value of the Fund and which the Fund is authorized to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):

- **Counterparty risk:** The Fund is exposed the risk that any counterparty with which it has concluded an agreement or a transaction could become insolvent or otherwise default and more particularly when it has concluded financial derivative instruments over-the-counter or securities lending transactions. If such an event occurs, the net asset value of the Fund may decrease significantly. According to the regulation applicable to the Fund, such risk cannot exceed 10% of the Fund's total assets per counterparty.
- **Risk of Financial derivative Instruments:** The Fund invests in financial derivative instruments. These financial derivative instruments can induce different type of risks such as (but not limited to), leverage risk, high volatility risk, valuation risk or liquidity risk. If this risk occurs, the net asset value of the Fund may decrease significantly.
- **Liquidity risk:** In certain circumstances, for example in case of low trading volume on financial markets, any buy or sale trade on financial instruments held by the Fund or having an impact on its value may lead to important variations of their valuations. In such circumstances, the net asset value of the Fund could be negatively affected.
